SUMMARY

AI Automation Engineer specializing in designing and deploying production-ready AI agents and workflow automations. Currently building AI-powered customer support and booking systems and training in advanced AI automation through Utiva, where I developed autonomous agents, chatbot systems and knowledge-retrieval solutions for real businesses. Experienced across the full automation stack: multi-step workflow development, AI agent design and full-stack development, with a track record of improving business performance by up to **30%** through automation and AI integration. Competent in team collaboration, training, and client-facing communication, with native fluency in English and proficiency in French.

SKILLS AND TOOLS

AI & Automation: AI Agent Design, Workflow Automation (n8n, Make, Zapier), Claude Code, Prompt Engineering, Chatbot Systems, Process Automation, Saas, APIs

Development: Python, JavaScript, React, Node.js, SQL, WordPress, GoHighLevel

PROFESSIONAL EXPERIENCE

UTIVA

United States (Remote))

AI AUTOMATION TRAINEE

June 2026 - August 2026

- **AI Sales & Support Agent (Beauty & Spa Business):** Designed and built an end-to-end AI booking agent using (n8n, Make, Zapier) and a vector-based knowledge base, capable of answering business-specific customer questions and autonomously booking appointments on Google Calendar with zero double-booking, including automated deposit and follow-up flows.
- **Social Media Automation:** Built automation workflows that handle recurring business tasks such as scheduled social media posting and data logging, reducing manual administrative work.
- **Content Intelligence & Auto Publisher:** Designed an n8n research workflow that collects trends from multiple sources into a database, then generates, schedules and publishes content automatically, removing the recurring manual content cycle.

ABOOVA DIGITAL SOLUTIONS

United States (Remote)

Software Engineer

January 2024 - June 2026

- **AI Agent Development:** Designed and deployed AI sales and support agents (built on n8n/GoHighLevel workflows) that handle customer conversations, answer business questions from a knowledge base and book appointments automatically, eliminating manual scheduling and double-booking.
- **Machine Learning Implementation:** Automated lead capture using Python AI conversations, engaging leads via SMS, calls, emails to improve conversion rates by **15%**.

- **Backend Engineering:** Converted customer data with SQL CRM systems, integrating payments and reviews to retain **20%** more clients in production environments.
- **Data Pipelines:** Designed automated workflows with Python for websites, enhancing data processing to boost business functionalities by **20%**.
- **Product Development:** Developed and deployed full-stack website using Node.js and React, increasing client acquisition by **5%** through optimized features.

SOFTGRID SOLUTIONS

Pakistan (Remote)

Software Development Intern

June 2026 - August 2026

- **Web Development:** Built **5** websites for client businesses over a 3-month internship, handling design, development, and deployment end-to-end.
- **Business Impact:** Helped **2** businesses increase their website visitors and overall conversions by **30%** through improved website performance and user experience.

GAO TEK

United States/Canada (Remote))

Web Development Intern

June 2026 - to date

- **Web Development:** Building and maintaining business websites using WordPress and PHP alongside standard front-end tooling.
- **Business Impact:** Delivered site improvements that boosted client business growth from **10-20%**.

EDUCATION

UTIVA

United States)

AI AUTOMATION BOOTCAMP

June 2026 - August 2026

UNIVERSITY OF BAMENDA

Bamenda, Cameroon

BSc, Mathematics and Computer Science

September 2025 - June 2025

CERTIFICATES

UTIVA AUTOMATION DIPLOMA
